

Please understanding and cooperation for coronavirus infection prevention measures

We would like to inform you about our school's response to the new coronavirus infection prevention measures. We are responding based on the manual of the Funabashi City Board of Education, please check the following and try again to ensure school activities run smoothly.

<Request for health observation before going to school>

Please observe your kid(s)'s health at home every morning, fill out the health check card including the results of the temperature measurement, and bring it with you to school.

<About leave school early>

If your child complains of not feeling well at school, we will take "early leave" measures.

In principle, kids cannot rest at school.

In addition, siblings' children will be left school early case, regardless of the presence or absence of symptoms. protection was able to take measures such as taking a rest in the health room and watching the situation, but now cannot take a rest at school because of measures to prevent infection of the coronavirus.

In addition, siblings' children will be withdrawn early just in case, regardless of the presence or absence of symptoms. We will need guardian to pick up, so we will contact you when you take measures to leave early. Be sure to be ready to get in touch. (Please let us know if your contact information changes.)

<When you are absent from school>

- When the child and the family living with the child have fever, cold symptoms, poor physical condition, etc.
- If the child or student or a family member living with him / her is suspected of being infected with the coronavirus and undergoes a PCR test, please refrain from going to school even if he / she has no symptoms until the test result is obtained.

* For heat generation, use normal heat + 1 ° C as a guide.

* There are several cases in which coronavirus infection was confirmed not only for fever but also for runny nose and abdominal pain. Observe your health at home, and if you have any of the symptoms that apply to you, wait and see at your home.

<Examples of how can the kids go to school>

- If there is no suspicion of a coronavirus infection as a result of having a fever or cold symptom in a family member living together and being diagnosed at a medical institution.
- When a child or a family member living together undergoes a PCR test that confirms a negative result according to instructions from the workplace, etc.

* If you are uncertain about how to respond, please contact the school staff. (047-431-2722)

We appreciate the understanding and cooperation of all parents of Katsushika Elementary School.
